PROFESSIONAL SUMMARY

Third-year B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning) student with hands-on experience building AI-powered applications, full-stack web products, automation systems, and production-oriented Discord infrastructure. Founder and developer of Voxen Development, a technology services community. TEDx speaker with a talk focused on lessons learned through gaming communities. Interested in Generative AI, AI agents, software engineering, automation, and product development.

TEDx SPEAKING ENGAGEMENT

TEDxKGCAS — TEDx Speaker	Public Speaking
Life Lessons I Learnt From My Gaming Community	Watch the TEDx talk ↗
A TEDx talk exploring how a gaming community can become an unexpected environment for learning, personal growth, and transferable life skills.	

EDUCATION

B.E. — Computer Science & Engineering (Artificial Intelligence & Machine Learning)
[College Name], Coimbatore, Tamil Nadu | Third Year | Expected Graduation: [Year] | CGPA: [Add CGPA]

Higher Secondary — Class XII: 63% Secondary — Class X: 81%

TECHNICAL SKILLS

Programming	Python, Java, C, C++, JavaScript, SQL
Web	HTML, CSS, JavaScript, React, Next.js, Tailwind CSS
AI/ML	Machine Learning, Generative AI, LLMs, AI Agents, Computer Vision, NumPy, Pandas, Scikit-learn
Backend / DB	Node.js, REST APIs, MySQL, MongoDB, Firebase
Tools	Git, GitHub, VS Code, Docker, Linux, WSL, Vercel
Automation	Discord Bot Development, API Integration, Workflow Automation, Prompt Engineering, SaaS Prototyping
Communication	Public Speaking, Technical Presentation, Community Building

EXPERIENCE & ENTREPRENEURSHIP

Voxen Development — Founder & Developer

- Founded and operate a technology-focused Discord community providing PC optimisation, web development, bot development, custom solutions, portfolio creation, and related digital services.
- Designed a structured client-service workflow covering service discovery, pricing, client requests, service status, billing support, client support, consultations, and testimonials.
- Built a complete all-in-one Discord management bot for Voxen Development, integrating server administration and operational workflows into a centralized system.
- Implemented and organized community features including verification, rules, client guidance, service navigation, request handling, status tracking, support, levels, suggestions, showcase, and voice/community features.
- Handled product structure, branding, service presentation, community operations, and technical development for the platform.

SELECTED PROJECTS

Closet AI — AI-Powered Wardrobe Management

- Designed an AI wardrobe-management application for tracking outfits and generating personalized recommendations based on occasions, activities, preferences, and user context.

AI-Powered Code Reviewer & Corrector

- Designed a Generative AI developer tool for code analysis, error explanation, correction suggestions, and GitHub pull-request/repository integration.

AI Health Diagnosis Assistant

- Conceptualized a multimodal AI application using symptoms, lifestyle information, and optional images to provide probable-condition insights and lifestyle/dietary guidance.

Mushroom Classification System

- Worked on data preprocessing, exploratory analysis, feature handling, classification, model evaluation, and comparison of traditional ML with neural-network approaches.

AI-Powered Warehouse Management System

- Designed an AI-native warehouse-management concept combining inventory workflows with intelligent automation and decision-support capabilities.

VOXEN DEVELOPMENT — SERVICE AREAS

PC Optimisation • Web Development • Bot Development • Custom Solutions • Professional Portfolio Creation • Client Consultation • Service Management • Client Support • Billing Support

AREAS OF INTEREST

Artificial Intelligence & Machine Learning • Generative AI & AI Agents • Full-Stack Development • Discord Systems & Automation • AI SaaS • Developer Tools • Computer Vision • Product Development • Open Source • Technical Entrepreneurship
